CANTORUM DUO VERSION HISTORY

CURRENT RELEASE: 1.0.10 (16/11/2021)

- Bug Fix: corrected the stereo panning of some orchestral voices

RELEASE: 1.0.9 (07/05/2021)

- Bug Fix: when the Crescendo pedal is set as MANI / PED and is not engaged, the Volume remains at zero

RELEASE: 1.0.8 (22/03/2021)

- Minor changes for hardware testing
- Only for service, added the ability to reprogram the FPGA on board (It is necessary to request a specific file)

RELEASE: 1.0.7 (12/02/2021)

- Bug Fix: if the instrument is started with a USB pen inserted using a particularly slow pen, the message: "PERIPHERALS UPDATE REQUESTED" may appear erroneously, with consequent malfunction

RELEASE: 1.0.6 (28/10/2020)

- Bug Fix: In SETTINGS/PEDALS set CRESC/EXPR as M.I/PED, and EXPR CH M.I/PED different from 2. Receive CC11 on the set channel, the volume of the pedal board is adjusted but not that of the Man.I. If channel 2 is selected it works correctly
- Bug Fix: Perform a factory reset without first entering the Velo sens page. Switch the instrument off and on again: Pedal Velocity = 1 FIX

RELEASE: 1.0.5 (21/09/2020)

- Fixed loss of notes on Midi out when control expression handled as Crescendo was received
- In Pipe mode the expression control is no longer sent on the midi out when this is handled as a Crescendo

RELEASE: 1.0.4 (13/07/2020)

- Fixed expression pedal problem (in the presence of a midi pedalboard) which only adjusts ManI if set to ManI / Ped
- modified the behavior when using pistons to drive an external MIDI sound module. Now when you hold down notes and press pistons to call up different MIDI voices, you no longer need to re-key the notes

RELEASE: 1.0.3 (23/05/2019)

- Modified DSP EQ filter section with 48-bit (formerly 24-bit) arithmetic to eliminate "bubbling" or "grumbling" noise

RELEASE: 1.0.2 (11/04/2019)

- Bug fix: With transpose> 0 if in STYLE / ORCHESTRA you play Piano and Harpsichord alternately, after a while the instrument goes into lock
- Minor changes for hardware testing

RELEASE: 1.0.1 (17/12/2018)

- Bug fix: With AP on, from MIDI IN record notes simultaneously on the channel of the Man.II and Pedalboard (91 40 - 93 40, 91 41 - 93 41,….). Some notes are recorded hanging on the Pedalboard channel.
- Speed up some display routines
- New Viscount logo
- Fixed problem of voices NOT combinable with the pedal board

RELEASE: 1.0.0 (18/06/2018) first release
